## **DETAILED ACTION**

### ***Specification and Drawings***

The examiner will assume that the applicant has matched all references in the drawings to the references in the specification, as previously requested. Consequently, the specification and drawings are herein approved.

### ***Allowable Subject Matter***

Claims 19-23 and 25 are allowed.

The following is an examiner's statement of reasons for allowance:

The applicant's arguments filed on 06/19/06 are persuasive. It is well known to one of ordinary skill in the art to have a keying feature on an ink container mate with a keying feature on the docking bay. (Schmidt et al (US Pat 5732751) discloses one such example in column 5, lines 43-48). However, no art was found which teaches a pump module keying feature mating with an ink container keying feature. In Schmidt et al, the pump module is formed integral with the ink container and such keying features cannot be said to exist.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

Art Unit: 2853

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Hmelar et al (US Pat 6183077) discloses a method and apparatus for keying ink supply containers.

Lee et al (US Pat 5818484) discloses a printing fluid supply system having an apparatus for maintaining constant static pressure.
